JOURNAL OF IMMUNOLOGICAL METHODS

Contents of volume 197 (1996)

Numbers 1–2 – 16 October 1996

Research reports

Automated routine HLA-B27 typing by flow cytometry
W.M. Reynolds, P.R. Evans, P.J. Wilson, W.M. Wong, C. Darke and J.L. Smith (UK) 1

Conformational display of two neutralizing epitopes of HIV-1 gp41 on the Flock House virus capsid protein
E. Buratti, S.G. Tisminetzky, E.S. Scodeller and F.E. Baralle (Italy) 7

Sensitive and specific immunoassays to detect rabbit IL-8 and MCP-1: cytokines that mediate leukocyte recruitment to the lungs
O. Kajikawa, R.B. Goodman, M.C. Johnson II, K. Konishi and T.R. Martin (USA, Japan) 19

Cu^{2+}-mediated complex formation between polyacrylic acid (PAA) and bovine serum albumin
M.I. Mustafaev, F. Yücel, S. Öztürk, B. Çırakoğlu and E. Bermek (Turkey) 31

Engineering of a recombinant colorimetric fusion protein for immunodiagnosis of insulin
C. Chanussot, L. Bellanger, C. Ligny-Lemaire, P. Seguin, A. Ménez and J.-C. Boulain (France) 39

Quantitation of the density of cell surface carbohydrate antigens on cancer cells with a sensitive cell-suspension ELISA
M.H. Ravindranath, P.M. Bauer, C. Cornillez-Ty, J. Garcia and D.L. Morton (USA) 51

Laboratory preparation of a deglycosylated ricin toxin A chain containing immunotoxin directed against a CD7 T lineage differentiation antigen for phase I human clinical studies involving T cell malignancies
D.A. Vallera, L.J. Burns, A.E. Frankel, A.R. Sicheneder, R. Gunther, K. Gajl-Peczalska, C.A. Pennell and J.H. Kersey (USA) 69

The ABL-MYC retrovirus generates antigen-specific plasmacytomas by in vitro infection of activated B lymphocytes from spleen and other murine lymphoid organs
D.A. Largaespada, M.W. Jackson, N.E. Thompson, D.A. Kaehler, L.G. Byrd and J.F. Mushinski (USA) 85

Isolation technique alters eosinophil migration response to IL-8
M.D. Rozell, R.A. Erger and T.B. Casale (USA) 97

Bias in murine IgG isotype immobilisation. Implications for IgG glycoform analysis ELISA procedures
R.H.V. Jones, T.W. Rademacher and P.J. Williams (UK) 109

A comprehensive method to purify three major ANCA antigens: proteinase 3, myeloperoxidase and bactericidal/permeability-increasing protein from human neutrophil granule acid extract
M.H. Zhao and C.M. Lockwood (UK) 121

A sensitive proliferation assay to determine the specific T cell response against HLA-A2.1-binding peptides
S. Mayer, C. Scheibenbogen, K.H. Lee, W. Keilholz, S. Stevanovic, H.G. Rammensee and U. Keilholz (Germany) 131

Flow cytometric identification of murine neutrophils and monocytes
E. Lagasse and I.L. Weissman (USA) 139

Characterization of murine monoclonal antibodies specific for the 45/47 kDa antigen complex (APA) of *Mycobacterium tuberculosis, M. bovis* and BCG
C. Horn, P. Pescher, F. Romain and G. Marchal (France) 151

Application of xanthine oxidase-catalyzed luminol chemiluminescence in a mouse interleukin-5 immunoassay
H.A.H. Rongen, H.M. Van der Horst, A.J.M. Van Oosterhout, A. Bult and W.P. Van Bennekom (Netherlands) 161

Enhancement of ELISAs for screening peptides in epitope phage display libraries
P. Valadon and M.D. Scharff (USA) 171

Quantification of immunological membrane reactions employing a digital desk top scanner and standard graphics software
L. Von Olleschik-Elbheim, A. El Bayâ and M.A. Schmidt (Germany) 181

Short communication

Inverse PCR amplification of low-abundancy message of γδ T cell receptor genes
J. Weber-Arden, O.M. Wilbert, D. Kabelitz and B. Arden (Germany) 187

Letter to the editors

Concentration of IgG in the sera of normal rhesus macaques as determined by a species-specific radial immunodiffusion assay
X. Lü and C.J. Miller (USA) 193

Contents of volume 197 197

Notes to authors 199
